PSNC activities in the area of Quantum Communication

INTRODUCTION

PRESENTATION OUTLINE

- Poznań Supercomputing and Networking Center
- Quantum Communication activities:
 - Projects, Programs, Initiatives
 - Publications
 - Presentations/Demos
- Summary

Poznań Supercomputing and Networking Center

PSNC ACTIVITIES

Center of e-Infrastructure

- National Research and Education Network PIONIER
- Research Metropolitan Area Network - POZMAN
- HPC Center
- Data repositories and Digital Libraries Federation

Center of Research & Development

- New Generation Networks
- HPC, Grids & Clouds
- Grand challenge applications
- New media and visualization technologies
- Knowledge Platforms
- Future Internet - Technology, Applications and Services for IS
- Cyber Security

Poznań Supercomputing and Networking Center

PSNC LOCATIONS

Laboratories

PSNC HQ

Data Center

**Living Labs
Coworking space**

POZMAN network

287 km fibers
Research community - 110 connections in city
and 8 connections in Wielkopolska region

Backup Data Center

Poznań Supercomputing and Networking Center

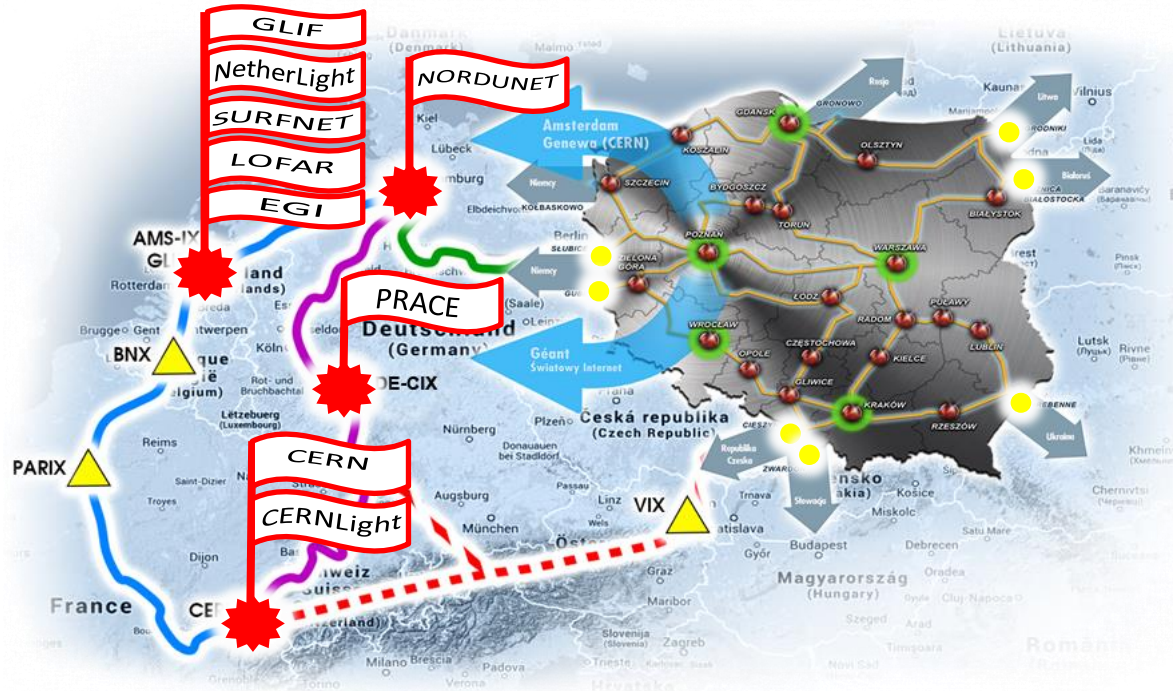

PIONIER NETWORK - POLAND

• Area	312k sq km
• Population	38M
• Main academic centers	21
• State universities	165+
• Students & researchers	1.5M+
• R&D institutions and Univ. interconnected via PIONIER network	700+

6663 km of fiber infrastructure in Poland
2359 km of fiber in Europe (IRU)
9022 km of fiber in total

PIONIER NETWORK - EUROPE

QUANTUM COMMUNICATION ACTIVITIES

- PSNC is active in the areas of quantum computing and quantum communication
- PSNC Quantum computing projects are focused on algorithms, use cases and hardware evaluation
- These works and projects are in most cases carried out together under one umbrella project and initiative
- It provides potential foundations for future hybrid networks and quantum communication infrastructure that will potentially connect quantum computing infrastructure

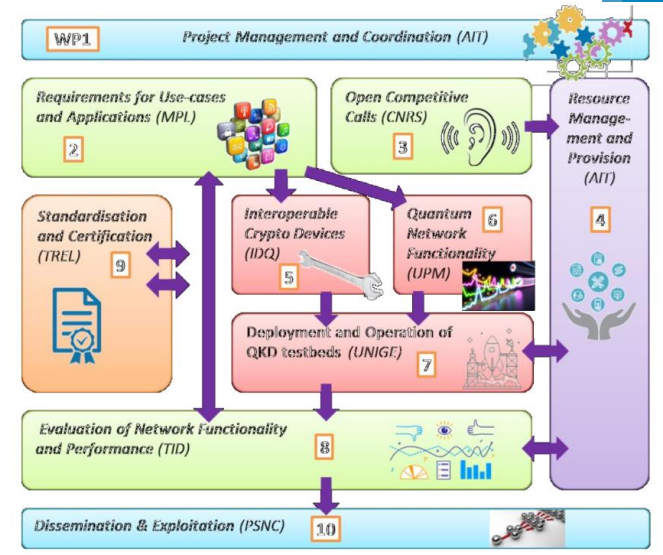

QUANTUM COMMUNICATION ACTIVITIES

PROJECTS

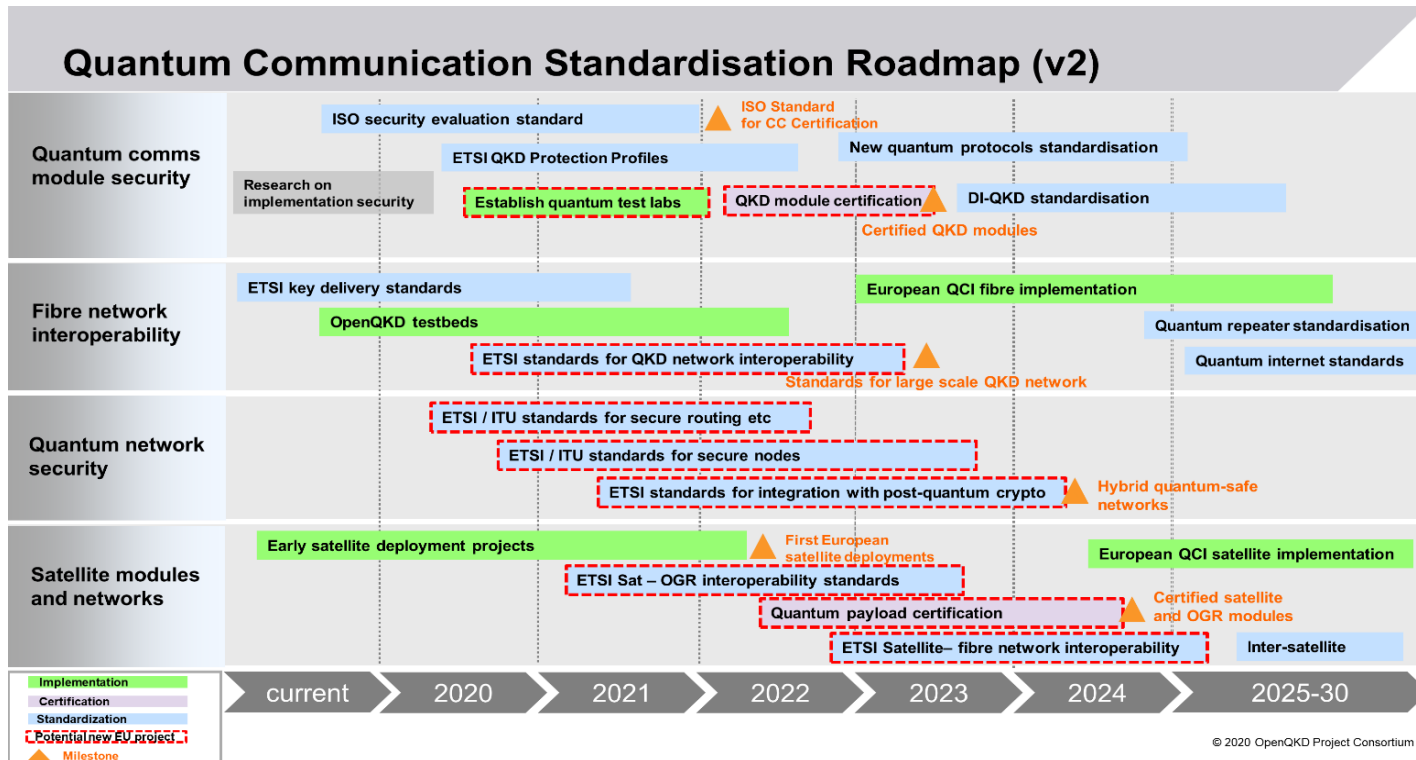

- PSNC takes part in the following projects and activities connected with Quantum Communication and QKD Technologies:
 - **OPENQKD (Horizon2020)**
 - **NLPQT (NCBiR)**
 - **QUAPITAL**
 - **GÉANT**
 - **Quantum Internet Research Group QIRG (IETF)**

OPENQKD

- Construction of QKD testbeds in Europe and implementation of 40 different scenarios for services using QKD technology
- Project start - October 2019
- Poznań is one of the main testbeds. Implementation and integration of QKD technology in the existing infrastructure and services of the POZMAN and PIONIER networks.
- Testing experimental QKD solutions in Poznań
- PSNC participates in works related to standardization activities and IPR
- PSNC will develop data management and analysis software
- Testbeds currently running in Geneva, Madrid, Berlin (June 2021). The epidemiological situation has suspended work for the remaining testbeds.

STANDARDIZATION AND CERTIFICATION

<https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/horizon-results-platform/29227>

© 2020 OpenQKD Project Consortium

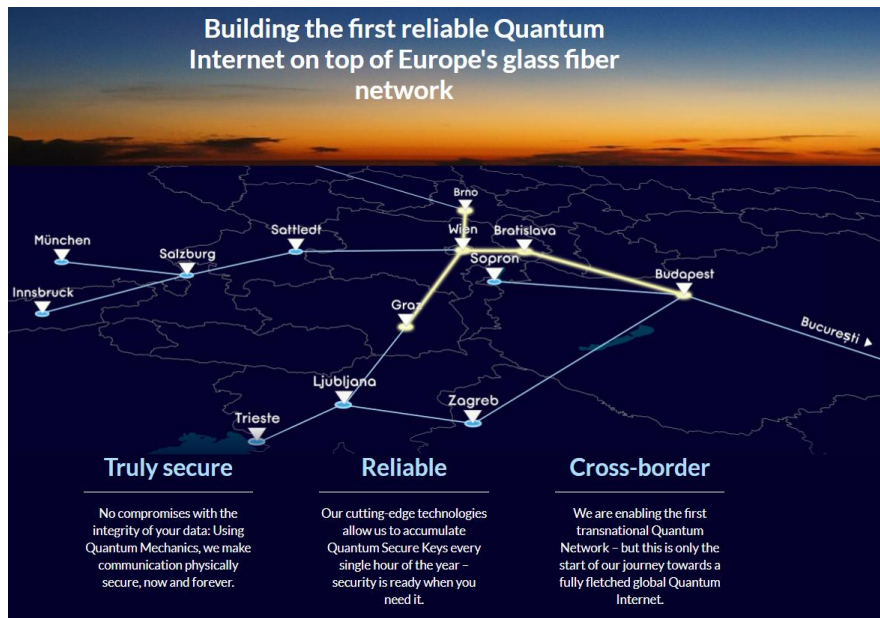

NATIONAL LABORATORY FOR PHOTONICS AND QUANTUM TECHNOLOGIES

- Construction of metro QKD research and operational infrastructure, integration of QKD solutions
 - QKD infrastructure (operational and R&D QKD devices, encoders and quantum random number generators)
- Construction of the QKD Poznań - Warsaw link
 - experiments related to quantum communication between University of Warsaw nodes and PSNC in Warsaw.
 - Experiments related to sources and detectors of single photons
 - Integration of the infrastructure with the optical carrier infrastructure
 - Next generation QKD prototypes testing (based on entanglement)

QUANTUM COMMUNICATION ACTIVITIES

QUAPITAL

- Project related to QKD technology and quantum communication in general.
- Talks on cross-border connections

QUANTUM COMMUNICATION ACTIVITIES

GÉANT

- PSNC is active in the WP6 T1 - QKD task
- Prepared plan, activity proposal for GÉANT and NREN
- Presentations on QKD technology for NRENs
- A survey was conducted among the NRENs on QKD technology to develop a strategy. Common activities, projects, plans and problems were identified
- TNC18/21 conference presentations
- Talks with suppliers of QKD devices: on wider cooperation with NRENs and GÉANT networks
- QCI strategy
- Quantum networks simulators testbed
- White paper, infoshares for NREN community

QIRG

- Document "Applications and Use Cases for the Quantum Internet" (draft-wang-qirg-quantum-internet-use-cases-06) during the last revision (end of May 2020).
- The document "Architectural Principles for a Quantum Internet" (draft-irtf-qirg-principles-03)
- The GÉANT WP6 T1 QKD Group submits its comments
- Abstract: "The Quantum Internet has the potential to improve Internet application functionality by incorporating quantum information technology into the infrastructure of the overall Internet. In this document, we provide an overview of some applications expected to be used on the Quantum Internet, and then categorize them using various classification schemes. Some general requirements for the Quantum Internet are also discussed. The intent of this document is to provide a common understanding and framework of applications and use cases for the Quantum Internet. "

QUANTUM COMMUNICATION ACTIVITIES

EuroQCI and Digital Europe

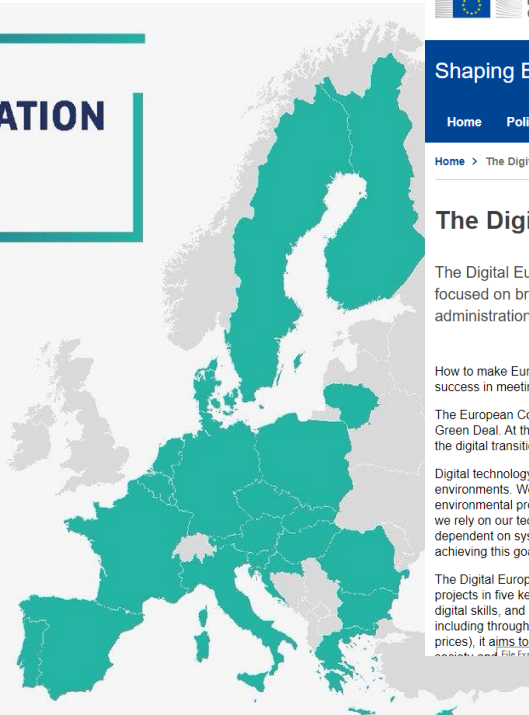

DECLARATION ON A QUANTUM COMMUNICATION INFRASTRUCTURE FOR THE EU

24 Member States

have signed a declaration agreeing to **work together** to explore how to build a quantum communication infrastructure (QCI) across Europe, boosting European capabilities in quantum technologies, cybersecurity and industrial competitiveness.

The countries taking part in the initiative are Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Italy, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain and Sweden.

@FutureTechEU #EuroQCI

A screenshot of the European Commission website. The top navigation bar includes the European Commission logo, a search bar, and links to Home, Policies, News, Library, Funding, Calendar, and Consultations. The main heading is "Shaping Europe's digital future". Below this, the page is titled "The Digital Europe Programme". The text describes the programme as a new EU funding programme focused on bringing digital technology to businesses, citizens, and public administrations. It mentions the twin challenges of making Europe greener and more digital, and the role of the Digital Europe Programme in providing strategic funding. The page also features a sidebar with links to "Funding & Tender Opportunities", "Horizon Europe", "Connecting Europe Facility", and "Work as an expert: Call for".

The Digital Europe Programme

The Digital Europe Programme (DIGITAL) is a new EU funding programme focused on bringing digital technology to businesses, citizens and public administrations.

How to make Europe greener and more digital are the twin challenges for our generation, and our success in meeting them will define our future.

The European Commission has begun to look at a greener Europe through the lens of the European Green Deal. At the same time, it is opening up discussions about the move to a more digital world: the digital transition.

Digital technology and infrastructure have a critical role in our private lives and business environments. We rely on them to communicate, work, advance science and answer current environmental problems. At the same time, the COVID-19 pandemic highlighted not only how much we rely on our technology to be available to us, but also how important it is for Europe not to be dependent on systems and solutions coming from other regions of the world. Paving the way for achieving this goal is DIGITAL programme.

The Digital Europe Programme will provide strategic funding to answer these challenges, supporting projects in five key capacity areas: in supercomputing, artificial intelligence, cybersecurity, advanced digital skills, and ensuring a wide use of digital technologies across the economy and society, including through Digital Innovation Hubs. With a planned overall budget of €7.5 billion (in current prices), it aims to accelerate the economic recovery and shape the digital transformation of Europe's societies and businesses, bringing benefits to citizens, but in particular to small and medium sized enterprises.

QUANTUM COMMUNICATION ACTIVITIES

PSNC QKD and QRNG equipment

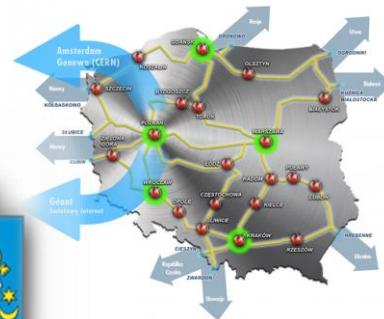

QUANTUM COMMUNICATION ACTIVITIES

PSNC OPENQKD testbed

- **Infrastructure in place as PSNC** is owner and operator of the infrastructure and network
- **Two QKD links installed and running** tests before the final deployment and use cases implementation
- **Various use cases are being prepared:** UC-06, UC-07, UC-08, UC-09, UC-10, UC-11 based on existing services and network. UC with VSB involves **QKD cross-border connection. Reference Time and frequency use case involves long distance connection.**
- **PSNC NOC** is working on implementing the monitoring and logging services for QKD infrastructure and services
- **SDN solutions currently analyzed**
- **Real world operational network** with shared infrastructure for quantum and classical communication and services. Connection point with other operators and several types and manufacturers of transmission equipment and encryptors
- **Direct connection with GEANT** node in Poland, network and services.

QUANTUM COMPUTING ACTIVITIES

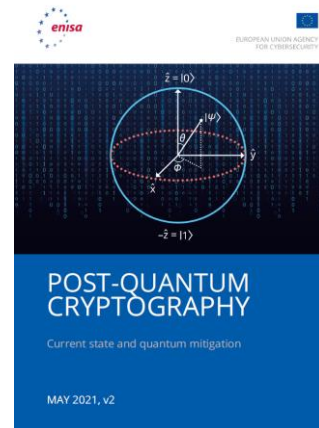

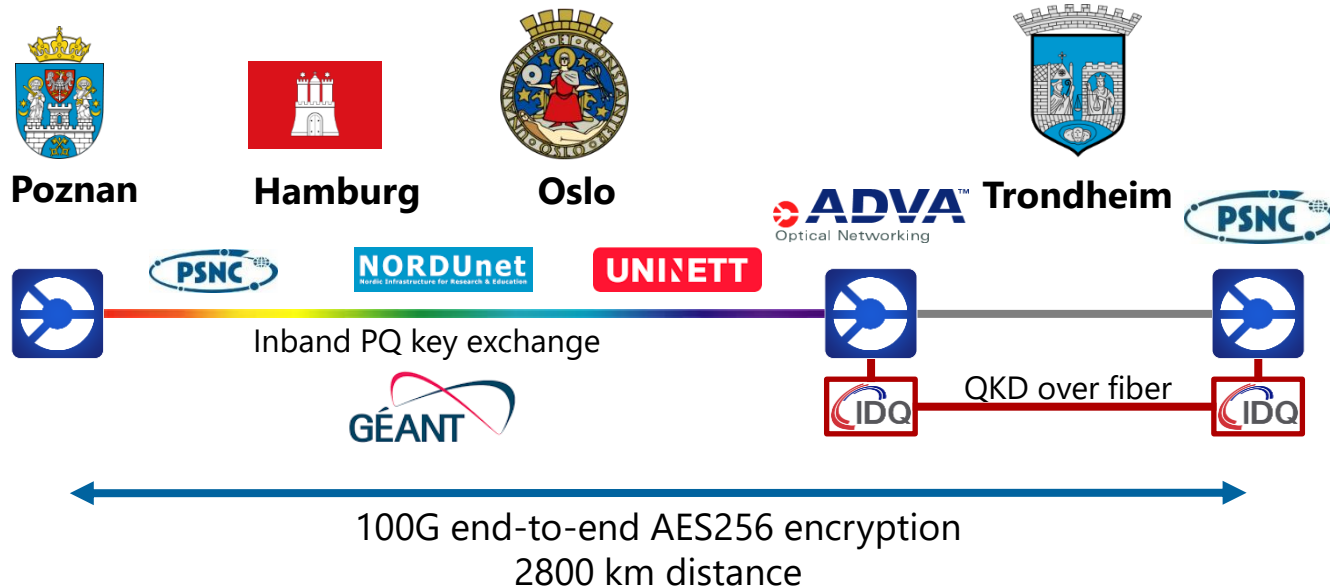

QUNATUM COMPUTING SIMULATORS

PSNC works on different Quntum Computing simulators - such as IBM, DWAVE

QUANTUM COMMUNICATION ACTIVITIES

Post Quantum and QKD algorithms demo - TNC18 conference

QUANTUM COMMUNICATION ACTIVITIES

TNC21 conference demo

Demo:

Secure Key Management for Multi-vendor
Interoperable Quantum Key Distribution Network

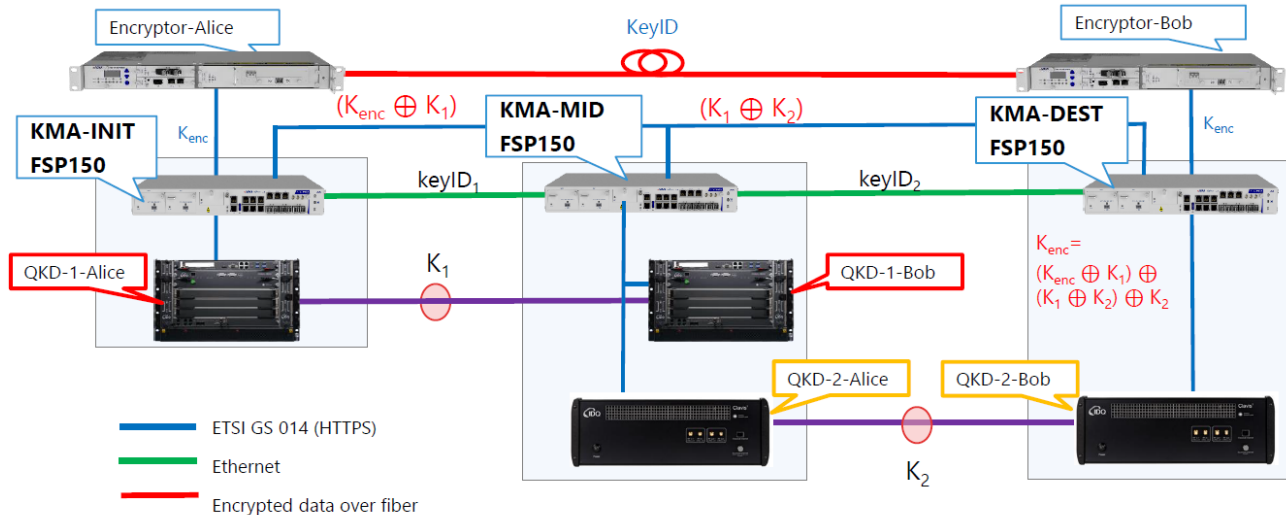

When: 22 June 2021 11.40-12.00

Where: Virtual

QUANTUM COMMUNICATION ACTIVITIES

TNC21 conference demo

Key Relay using ADVA FSP150

SUMMARY

- PSNC projects are focused mainly on the implementation and integration aspects
- Support for the whole NREN and GEANT community in Europe
- Possible support for QCI initiative
- Cooperation with vendors and R&D partners
