A thematic Data Space: European Health Data Space (EHDS)

Tuesday, 13 December 2022 10:35 (15 minutes)

The regulation for the European Health Data Space (EHDS) has been under discussion between the European Commission (DG SANTE, DG-CNECT, DG-RTD) and the EU member states this year. Its main objectives are to ensure EU individuals to have increased control over their health data and to provide a consistent, trustworthy and efficient set-up for the use of health data for research, innovation, policy-making and regulatory activities. I will highlight lessons learnt from the discussions around this regulation.

Presenter: BECKMANN, Volker (MESR)

Session Classification: Data Infrastructures and Data Spaces
