

A5: GitLab & Kubernetes in Practice

Tuesday, 12 December 2023 09:00 (1h 30m)

The aim of the session is to boost adoption of containerisation in the development process implemented in the Geant GitLab and Kubernetes. During the cross-workspace discussion we will shortly introduce containerisation and try to identify blockers and specific user requirements based on chosen case-studies. The session is dedicated to development team members and especially to the SSE 2023 participants.

Presenter: KUPIŃSKI, Szymon (PSNC)
