Security Products and Services

Tuesday, 9 April 2024 13:30 (3h 30m)

This interactive session will be a chance to gain insight into which (kinds of) security products and services we as NRENs are running and creating for our members. Attendees will be invited to exchange ideas and experiences to see if there are things we can learn from each other, see if a more consistent experience exchange would be valuable and discuss the services GÉANT is running centrally.

More information about this side meeting is available on the GÉANT wiki.

Presenters: VAN GENUCHTEN, Charlie (SURF); ROSS, Jennifer (GÉANT)
