SOCCER project: Supporting establishment of university SOCs and collaboration in academic sector

Wednesday, 10 April 2024 15:45 (5 minutes)

The SOCCER project (Security Operation Centre in Central-Eastern Europe Region) aims to support the establishment and advancement of Security Operations Centres (SOCs) within the participating universities, as well as to share knowledge about SOC development and deplyoment and to foster information sharing among the broad academic cybersecurity commnuity.

The lightning talk will be focused mainly on introducing two of the expected outcomes of the project: (i) SOC4Academia toolbox - a set of documents to share the knowledge about the SOC development, deployment and functioning as well as models of possible SOC services deployment and integration; and (ii) establishment of information & CTI sharing ecosystem for academic sector.
