

Fighting NeMo

Wednesday, 10 April 2024 16:35 (5 minutes)

GÉANT's adoption of NeMo presented significant challenges for our security teams. From the tool's scope to configuration, GÉANT SOC & Security had to transform NeMo —a DDoS initially optimized for the organization that conceived it —into a robust solution capable of securing network uplinks and preventing DDoS across the entire GÉANT network. Join Ryan Richford as he explores the hurdles faced in achieving this ambitious goal.

Presenter: RICHFORD, Ryan (GÉANT)

Session Classification: Lightning Talks
