Local Vulnerability Scanning

Monday, 28 June 2021 14:00 (60)

Today's systems are so complex that it is almost impossible to run a system without vulnerabilities and misconfigurations. And although there are plenty of benchmarks, baselines and guides available, it is difficult to apply them to the local environment. This webinar will introduce some of the most useful frameworks and tools for local vulnerability scanning.

Presenter(s)/Facilitator(s): Stefan Kelm, DFN-CERT

Affiliation (WP/Task): WP8 Task 1

Authors (content is created by): Tobias Dussa, Klaus Möller, DFN-CERT

Network Vulnerability Scanning

Wednesday, 30 June 2021 14:00 (60)

In order to stay ahead of the threats to a large infrastructure, it is crucial to maintain a clear picture of whether there are vulnerabilities in the components deployed and, if so, what the vulnerabilities are. Scanning systems through the network is one way of gaining insight into this issue. This webinar will provide an introduction to the concepts of network scanning, its benefits, and its drawbacks, as well as offer some practical examples.

Duration: 1 hour (includes Q&A)

Webinar Host: Pauline Smith (GLAD)

Presenter(s)/Facilitator(s): Tobias Dussa , DFN-CERT

Affiliation (WP/Task): WP8 Task 1

Authors (content is created by): Klaus Möller, Stefan Kelm, DFN-CERT

Contribution ID : 3

Penetration Tests

Monday, 13 September 2021 14:00 (60)

No matter how much scanning for vulnerabilities and security process evaluating is done, one question remains: is this really enough against real attacks? Short of experiencing an attack in real life, penetration tests try to answer this question by conducting attacks in a controlled manner. This webinar will give managers and administrators an introduction to the standards and workflow of penetration tests to help in planning and supervising penetration tests carried out on their networks.

Please note that this session will re-scheduled, as soon as the new date becomes available we will be in touch.

Duration: 1 hour (includes Q&A)
