Service Provider Architecture (SPA)

Friday, 25 June 2021 14:30 (5 minutes)

The Service Provider Architecture (SPA) is a service management platform that is based on the TMForum Open Digital Framework. The main SPA components are currently being used to support the production use of the GÉANT Connection Service - GCS developed and maintained by the GCS group in WP7. The SPA SSP is the main GUI used by the GEANT NOC to manage GCS, and the SPA components interface with the OpenNSA agents that implement the service in the GÉANT network.
